CAIRNS HARDWARE THE ULTIMATE CLADDING SOLUTION

Now more than ever, Australian homeowners are on the hunt for visual, stand out homes with eye-catching street appeal. Exposed to a host of architectural styles and design inspiration thanks to blockbuster renovation TV shows, social media, the internet and magazines, educated homeowners are savvier than ever and expect builders to have a complete understanding of every product available on the market.

You can get up to speed with Cairns Hardware

Lean on our experienced team for ideas and advice

Ask us to arrange supplier experts to visit you on site

Get cladding delivered to your site when you need it

HELPING BUILDERS SUCCEED IS OUR FOCUS

Experience the Cairns Hardware difference.

Our dedicated team works directly with you to customise, supply and install solutions. We deliver what you need, when and where you need it – that's our promise.

From Foundation to Fit Out, we have you covered.

- ▶ A one stop shop
- ▶ Personalised account management
- ▶ Save time and have us manage the multiple call ups
- ▶ Peace of mind and reduced hassle
- ▶ Your administration simplified

WEATHERBOARDS

*CREATE CONTEMPORARY HAMPTONS,
MODERN COASTAL AND TRADITIONAL HOMES*

WEATHERBOARD LINEA™

The clean horizontal lines of Linea™ weatherboards work beautifully on the expansive external walls of modern architecture to create deep shadow lines

FIRE RATED

BAL RATED

NON-COMBUSTIBLE

LOW MAINTENANCE

MATERIAL AND CONSTRUCTION

- Made from fibre cement
- 25-year limited warranty
- Maintains its integrity and general appearance significantly longer than timber

APPLICATIONS

- Lower and upper storey external walls
- Full wrap or as a feature

INSTALLATION

- Concealed fix
- Variety of corner and window treatment options
- Preprimed for fast paint application
- The Linea™ window adapter can be used for subtle window treatments or the Axent™ trim can provide a contrast
- Back bevelled to sit flush with the stud and installed easily using a Lap Gauge
- Can be gun nailed and is easy to cut – like timber

MAINTENANCE

- Weatherboards are preprimed to hold paint longer
- Weatherboards can be painted in modern and darker colours without affecting board performance
- Resistant to rotting, moisture damage and termites
- Resistant to shrinking or swelling

SIZES AVAILABLE AND SPECIFICATIONS

LINEA	COVER WIDTH (MM)	PANEL WIDTH (MM)	LENGTH (MM)	THICKNESS (MM)	SURFACE TEXTURE	MASS (KG/M ²)

WEATHERBOARD BALMORAL

FIRE RATED

BAL RATED

NON-COMBUSTIBLE

LOW MAINTENANCE

MATERIAL AND CONSTRUCTION

- Made from Fibre Cement
- Pre-Primed and ready to paint
- 25 year warranty

APPLICATIONS

- Upper and lower storey additions
- Gable ends
- Feature panels

INSTALLATION

- Concealed fixing system
- Tongue and groove profile
- Can be installed with a drained cavity solution
- Pre-primed boards can be cut at different lengths to minimise waste

MAINTENANCE

- Low maintenance when compared to natural timber products
- Resistant to rotting, moisture damage and termites
- Fire resistant
- Weatherboards can be painted in modern and darker colours without affecting board performance
- Provides a tough, durable cladding system
- Resistant to rotting, moisture damage and termites
- Resistant to shrinking or swelling

WEATHERBOARD CLASSIC

Traditional weatherboard design available in smooth and Ruff Sawn finishes

FIRE RATED

BAL RATED

LOW MAINTENANCE

SUSTAINABLE

MATERIAL AND CONSTRUCTION

- Made from 97% sustainably sourced hardwood timber and 3% wax
- Better than zero carbon footprint
- Australian hardwood timber
- No added silica, glues or formaldehydes
- 25-year warranty on primed product
- Made in Australia for over 50 years
- Residential and some commercial applications

APPLICATIONS

- Available in preprimed boards
- Lower and upper storey external walls
- Full wrap or a feature
- Internal feature walls

INSTALLATION

- Quick and easy to install
- No special tools required for cutting
- Easier to paint than other materials on the market due to its smoother surface.
- Lightweight product – under 10kg per square meter
- Watertight – mechanical flashing and joining accessories mean that sealant control joints are seldom required
- Off stud joining option enables minimal waste and less timber stud layout
- Cavity systems can be used as an option

MAINTENANCE

- Termite resistant
- Low maintenance – tested not to rot, split or crack
- Average repainting every 15 years

WEATHERBOARD SELFLOK

Weatherboards with unique shiplap self-locking system which ensures that each board is perfectly aligned and easily installed

FIRE RATED

BAL RATED

LOW MAINTENANCE

SUSTAINABLE

MATERIAL AND CONSTRUCTION

- Made from 97% sustainably sourced hardwood timber and 3% wax
- Better than zero carbon footprint
- No added silica, glues or formaldehydes
- Australian hardwood timber
- Available in preprimed and natural finishes
- 25-year warranty on primed product ,10 year warranty on natural
- Made in Australia for over 50 years
- Residential commercial applications

APPLICATIONS

- Available in preprimed boards
- Lower and upper storey external walls
- Full wrap or a feature
- Internal feature walls

INSTALLATION

- Fast and easy to install thanks to shiplap system which allows every board to self-gauge
- No special tools required for cutting
- Easier to paint than other materials on the market due to its smoother surface
- Lightweight product – under 10kg per square meter
- Watertight – mechanical flashing and joining accessories mean that sealant control joints are seldom required
- All profiles can be direct fixed to frame within warranty
- Cavity systems can be used as an option
- Off stud joining option enables minimal waste and less timber stud layout (preprimed only)

MAINTENANCE

- Termite resistant
- Low maintenance – tested not to rot, split or crack
- Average repainting every 15 years

GROOVE

*SLEEK, MODERN AND
EFFORTLESSLY ARCHITECTURAL*

VERTICAL GROOVE AXON™ CLADDING

FIRE RATED

BAL RATED

NON-COMBUSTIBLE

LOW MAINTENANCE

MATERIAL AND CONSTRUCTION

- Made from fibre cement
- 10 year limited warranty
- Maintains its integrity and general appearance significantly longer than timber

APPLICATIONS

- Paint dark or light - it will resist shrinking, swelling and cracking to hold paint longer than wood can
- Available in smooth or grained finishes
- Lower and upper storey external walls
- Full wrap or a feature
- Internal feature walls

INSTALLATION

- 1200mm wide sheets slot together with shiplapped vertical joint
- Preprimed for fast, easy painting
- Quick and fast installation with a nail gun
- Shiplap joins on edge of sheets allow for easy install
- Variety of corner and window treatment options
- Sheets are sized to fit common wall frame sizes, which means less waste and cutting

MAINTENANCE

- Preprimed to hold paint longer
- Sheets can be painted in modern and darker colours without affecting performance
- Resistant to rotting or moisture damage
- Resistant to shrinking or swelling

VERTICAL & HORIZONTAL GROOVE HARDIE™ OBLIQUE™ CLADDING

Evoked a bold, contemporary aesthetic with the wide grooves and bespoke design flexibility of Hardie™Oblique™ Cladding

FIRE RATED

BAL RATED

NON-COMBUSTIBLE

LOW MAINTENANCE

MATERIAL AND CONSTRUCTION

- Made from fibre cement
- 25-year limited warranty
- Install vertically or horizontally
- When orientated northwards the slanted edge creates depth and elevation

APPLICATIONS

- Paint dark or light – it will resist shrinking, swelling and cracking to hold paint longer than wood can
- Available in 200mm or 300mm widths with 175mm or 275mm groove spacing
- The two board widths can be mixed and matched for bespoke groove spacing arrangements
- Lower and upper storey external walls

INSTALLATION

- No need for specialist trades reducing complexity and trades onsite
- Horizontal castellated battens, simple vertical installation
- When installed vertically, the 2750mm length boards suit common wall heights which can help to minimise cutting, joining and wastage

MAINTENANCE

- Pre-primed to hold paint longer
- Sheets can be painted in modern and darker colours without affecting performance
- Resistant to rotting or moisture damage
- Resistant to shrinking or swelling

VERTICAL GROOVE WEATHERGROOVE

Create contemporary, urban homes with an architectural look with the vertically grooved cladding, Weathergroove

FIRE RATED

BAL RATED

LOW MAINTENANCE

SUSTAINABLE

MATERIAL AND CONSTRUCTION

- The largest grooved panel available in Australia – 3.66m in height - minimising horizontal lines and speeding up installation
- Made from 97% Australian hardwood timber and 3% wax
- Better than zero carbon footprint
- Deep vertical lines for a bold expression
- Available in natural or pre-primed
- Australian made and owned for over 50 years
- Sustainably sourced timber – PEFC certified
- 25-year warranty on primed product, 10-year warranty on natural product

APPLICATIONS

- Residential
- Lower and upper-storey external walls
- Full wrap or as a façade feature
- Schools, childcare centres and commercial builds
- Internal feature walls

INSTALLATION

- Quick and easy to install
- No special tools required for cutting
- Easier to paint than other materials on the market due to its smoother surface
- Lightweight product – under 10kg per square meter
- Watertight – mechanical flashing and joining accessories mean that sealant control joints are seldom required
- Off stud joining option enables minimal waste and less timber stud layout
- Range of groove spacing for various design options
- Universal edge which makes it possible to flip and reuse offcuts

MAINTENANCE

- Termite resistant
- Low maintenance – tested not to rot, split or crack
- Average repainting every 15 years

VERTICAL & HORIZONTAL GROOVE SHOU SUGI BAN

MATERIAL AND CONSTRUCTION

- Shou Sugi Ban comes as a complete system supplied with black matte aluminium trims to seal out moisture and finish the look
- Crafted from solid Australian Cypress and Australian hardwood
- BAL rated – up to BAL 29
- Profile includes relief grooves to reduce warping and cupping
- Manufactured in Australia

APPLICATIONS

- Lower and upper storey external walls
- Full wrap or as a feature

INSTALLATION

- Secret fix profile
- Screw location line indicates exactly where to fix the cladding board, allowing the next row to slide over the existing board and create a secret fix finish
- Allowances have been made for expansion gaps, but must be implemented using a 6mm spacer to achieve a uniformed shadow line
- All aluminium trims are factory fitted with waterproof gaskets designed to expedite the on-site sealing process, and reduced the delivery of loose materials.
- Shou Sugi Ban is supplied pre-oiled with Feast Watson Timber and Deck Stain, Black Japan to assist in the protection from aging and colour change
- Install guide provided

MAINTENANCE

Feast Watson Timber & Deck Stain, Black Japan or Intergrain Industrial Solid Timber Stain Charred Black is periodically required to maintain the dark burnt look of Shou Sugi Ban

SIZES AVAILABLE AND SPECIFICATIONS

SHOU SUGI BAN	COVER WIDTH (MM)	PANEL WIDTH (MM)	LENGTH (MM)	THICKNESS (MM)	SURFACE TEXTURE

VERTICAL & HORIZONTAL GROOVE WOOD ELEMENTS

MATERIAL AND CONSTRUCTION

- Crafted from solid Australian Hardwood, available in Blackbutt, Ironbark, Spotted Gum, Tallowwood and Turpentine
- BAL rated – up to BAL 29
- Option of three profile designs
- Machined extremely straight to a fine tolerance
- Profile includes relief grooves to reduce warping and cupping
- Manufactured in Australia
- Cladding and corners can be supplied raw or in-factory oiled on both faces and edges

APPLICATIONS

- Lower and upper storey external walls
- Full wrap or as a feature

 **DOWNLOAD
BROCHURE**

 **DOWNLOAD
INSTALLATION GUIDE**

INSTALLATION

- Secret fix profile
- Specially designed ridge locator connects with the overlap line to provide an effortless straight-line finish, while also providing an expansion allowance
- Comes with a range of aluminium or timber trims to finish the look and seal out the weather
- Wood Elements is end matched allowing boards to be fixed mid stud or cavity batten
- Wood Elements is the complete Cladding Solution which includes the solid timber cladding, architectural corners in either timber or aluminium as well as fixings
- Wood Elements trims feature factory fitted gaskets that help repel water, expediting the onsite sealing process
- Install guide provided

MAINTENANCE

Depending on the aesthetic the homeowner is trying to achieve, the orientation of the dwelling and application maintenance ranges from nil to annual oiling

VERTICAL & HORIZONTAL GROOVE SHADOWLINE CLADDING

The most natural timber looking composite cladding in Australia, fully finished and requires no painting ever. Guaranteed not to fade in even the harshest conditions

PREFINISHED

LOW MAINTENANCE

SUSTAINABLE

MATERIAL AND CONSTRUCTION

- The core is made of 60% recycled dense wood fibre mixed with 35% high grade recycled plastics (HDPE).
- Fully-capped, the shield is made of special engineering grade polymer and additives with a water absorption rate as low as 0.1%. The shield fully caps the core around all four sides (including grooves).
- Durable – 25-year residential and 10-year commercial warranty

APPLICATIONS

- All exterior wall linings
- Alfresco ceiling linings
- Privacy screens

INSTALLATION

- Fix to battens
- Concealed clip system
- Matching corner and end trims
- Horizontal or vertical installation

MAINTENANCE

- UV inhibitors, will not fade
- Low maintenance, no oiling, sanding, or painting – ever
- Ultra-protection against moisture, and termites
- Dust and dirt washes off

VERTICAL AND HORIZONTAL GROOVE ENDURE TIMBER CLADDING

MATERIAL AND CONSTRUCTION

- Made from select grade Cumaru hardwood
- Porta Endure Timber Cladding is available in a range of textured profiles and a shiplap profile. Unique specific custom designs can be produced to suit the requirements of a project
- Termite resistant
- Near zero leaching
- Class 1 Durability – Lasts 40+ years above ground
- FSC® certified as responsibly harvested and processed
- Sustainably Certified
- Made to order

APPLICATIONS

- Lower and upper storey external walls
- Full wrap or as a feature
- Internal feature walls

INSTALLATION

- Textured profiles are available with a tongue and groove connection for easy alignment and fast installation
- Shiplap is available as standard with a tongue and groove connection. Alternative connections include D-Joint and Face Fix, available on request. D-Joint is a specialty engineered connection that has been designed for increased fixing strength and superior weather tightness
- All designs allow for expansion
- Preferred fixing is by cladding screws, such as 4.0 x 45.0 mm or equivalent
- Lengths can be joined by fixing ends over a batten or stud. End-matching is currently not available

MAINTENANCE

- Porta Endure can be enhanced by a range of clear coatings, as well as oil and wax-based coatings
- A maintenance schedule is recommended to preserve the appearance and dimensional stability of the timber
- To maintain the timber colour, choose a pigmented coating. If the goal is for the timber to weather to grey, choose an unpigmented coating

TEXTURE HARDIE™ FINE TEXTURE CLADDING

Create exterior walls with a modern rendered look without the need for a renderer, specialist cement or acrylic texture coating

FIRE RATED

BAL RATED

NON-COMBUSTIBLE

LOW MAINTENANCE

MATERIAL AND CONSTRUCTION

- Made from fibre cement
- 10 year limited warranty
- Maintains its integrity and general appearance for the long haul
- Preprimed to hold paint longer
- Sheets can be painted in modern and darker colours without affecting performance
- V-groove joint detail accommodates building movement and darker paint colours without the risk of cracking
- Available in wider and taller panel sizes for minimal joints and maximum coverage

APPLICATIONS

- Lower and upper storey external walls
- Full wrap or a feature

INSTALLATION

- Embedded texture delivers modern render look without the need for wet trades – simply fix and paint
- Easy-to-install shiplap design
- Wider and taller panel sizes mean minimal joints and maximum coverage

MAINTENANCE

- Low ongoing maintenance – simply wash down periodically
- Resistant to cracking, lime staining, rotting, moisture damage, shrinking and swelling

GEOMETRIC MATRIX™ CLADDING

Matrix™ Cladding is an exterior cladding system with a clean, modern, expressed-joint look. Matrix offers a bold industrial aesthetic when an architectural panelised look is desired

- FIRE RATED
- BAL RATED
- NON-COMBUSTIBLE
- LOW MAINTENANCE

MATERIAL AND CONSTRUCTION

- Made from fibre cement
- 10 year limited warranty
- Maintains its integrity and general appearance significantly longer than timber

APPLICATIONS

- Full wrap or a feature
- Internal feature walls

INSTALLATION

- No need for steel top hats as matrix sheets are installed on Axent™ Cavity Trim battens
- Variety of corner and window treatment options
- Sealed on all sides, sanded smooth and preprimed for a high quality finish
- Easily installed on Axent™ Cavity Trim, fixed in place easily by gun nailing
- 8mm thick for fast installation with nails
- A 10mm packer to make the express joint easy and uniform

MAINTENANCE

- Resistant to rotting or moisture damage
- Resistant to shrinking or swelling
- Sheets can be painted in modern and darker colours without affecting performance

GEOMETRIC RUBIX PANEL

Build sleek, modern homes and multi-residential developments with Rubix Panel, a self-locking panel, available in square or rectangle designs

FIRE RATED

BAL RATED

LOW MAINTENANCE

SUSTAINABLE

MATERIAL AND CONSTRUCTION

- 4mm deep, 10mm wide smooth groove
- Made from 97% Australian hardwood timber and 3% wax
- Better than zero carbon footprint
- No added silica, glues or formaldehydes
- Available in preprimed finish
- Made in Australia for over 50 years
- Sustainably sourced timber
- 10 year warranty

APPLICATIONS

- Lower and upper storey external walls
- Full wrap or as a feature
- Internal feature walls

INSTALLATION

- Self-locking system that doesn't need joining accessories
- No need to preplan the stud layout and no joining accessories are required
- Use various sizes to make unique geometric patterns
- Rebated edges
- Minimal wastage
- Quick and easy to install
- No special tools required for cutting
- Easier to paint than other materials on the market due to its smoother surface

MAINTENANCE

- Termite resistant
- Low maintenance – tested not to rot, split or crack
- Average repainting every 15 years

- Internal feature walls

INSTALLATION

- Machined with a complimentary tongue and groove that fit easily together
- Simple clip fixing system
- Concealed joining
- Choice of simple aluminium or colour matched, preformed corners
- Provides a ventilated cavity to keep your building dry
- NichiGuard® stain resistant and self-cleaning coating
- Compressible sealing strip factory bonded onto the tongue profile to form a weather resistant joint

MAINTENANCE

- Minimal ongoing maintenance
- Regularly inspect panel surfaces and follow wash down procedures when required
- Platinum coating technology protects against
- UV damage and colour fade

METAL

*ARCHITECTURAL ELEGANCE EFFORTLESSLY
CREATING MODERN AND INDUSTRIAL DESIGNS*

METAL NAILSTRIP

Simple installation has made Nailstrip a favourite among owner builders, beginner installers, and those who want an architectural ‘look’, without complicated installation details

-  PREFINISHED
-  FIRE RATED
-  BAL RATED
-  NON-COMBUSTIBLE
-  LOW MAINTENANCE

MATERIAL AND CONSTRUCTION

- All dimensions are material and transport dependant, and open to customisation
- Nailstrip is best folded in Colourbond Steel® or precoated aluminium
- Panels can be laid vertically, horizontally and diagonally, in fixed widths, or random patterns
- Manufactured in Australia: from BlueScope COLORBOND® Steel and other quality sheet metals
- Long-term warranty: up to 12 years for COLORBOND® panels, up to 40 years on aluminium panels (subject to project location)
- Manufactured by Metal Cladding Systems in Braeside, Victoria which has more than 30 years’ sheet metal manufacturing experience

APPLICATIONS

- Lower and upper storey external walls
- Full wrap or as a feature
- Internal feature walls

INSTALLATION

- Easy-to-install, especially for those with cladding experience
- Vertical installations are best for beginners and those without a roofing plumber
- Can be contracted to be installed by roofing plumbers
- Made to measure: means minimal on-site cutting
- Light weight and easy to handle
- Install on ply or metal battens
- Range of standard and custom flashings available
- Installation guides and advice available

MAINTENANCE

- Low maintenance: no painting, oiling or up keep
- No termites, cracking or peeling

SIZES AVAILABLE AND SPECIFICATIONS

NAIL STRIP	COVER WIDTH (MM)	PANEL WIDTH (MM)	LENGTH (MM)	HEIGHT OFF SUBSTRATE (MM)	SUBSTRATE	MASS (KG/M²)

METAL UNICOTE® LUX

UniCote® LUX is a luxury pre-painted patterned steel product designed to suit high-end Australian architecture

- PREFINISHED
- FIRE RATED
- BAL RATED
- NON-COMBUSTIBLE
- LOW MAINTENANCE

MATERIAL AND CONSTRUCTION

- Premium, pre-painted steel cladding, available in a range of patterned designs including textured steel, timber and metal finishes
- Achieves an architectural aesthetic
- Advanced PVDF paint technology with 5 layers of paint
- Up to a 25-year warranty on roofing and walling
- Compliant to all Australian colour steel testing including fire rating
- Superior gloss and colour retention
- Non-combustible and BAL zone appropriate materials with a fireproof substrate

DOWNLOAD BROCHURE

APPLICATIONS

- Suitable for roofing and wall cladding
- Cost effective alternative to natural equivalents
- Full wraps or as feature walls

INSTALLATION

- Quick and easy to install for those with cladding experience
- Can be contracted to be installed by roofing plumbers
- Lightweight product and easy to handle
- Installation guide and advice available

MAINTENANCE

- Low maintenance relative to natural equivalents
- No painting, oiling or up keep
- No termites, cracking or peeling

METAL LUXEWALL

LuxeWall[®] luxury insulated panels are ideal for home owners who prefer a premium look and exceptional thermal performance

-  PREFINISHED
-  FIRE RATED
-  BAL RATED
-  NON-COMBUSTIBLE
-  LOW MAINTENANCE

MATERIAL AND CONSTRUCTION

- LuxeWall[®] Insulated Walling Panel offering two cores
 - LuxeWall[®] – Expanded Polystyrene with Fire-Retardant
 - LuxeWall FlameGuard[®] – Mineral Wool
 - Available in 50mm and 75mm core thickness
- LuxeWall[®] and LuxeWall FlameGuard[®] External Features
 - COLORBOND[®] Steel 0.6mm G300
 - BlueScope[®] ‘Ready Render’ Etch Primed Steel
 - Available in Metallic and Matt finish
- LuxeWall[®] & LuxeWall FlameGuard[®] External Profiles
 - Plain
 - VJ
 - Finished with a patented market first concealed fix “UniSmart” architectural trim and capping system for window and door openings
- CodeMark[™] Approved
 - LuxeWall[®] – CodeMark Certificate CM40203
 - LuxeWall FlameGuard[®] – CodeMark Certificate CM40239

- BAL Rated
 - LuxeWall[®] – BAL 40
 - LuxeWall FlameGuard[®] – BAL FZ, Approved for 60/60/60 and FRL 90/90/90
- Up to 15 years warranty

APPLICATIONS

- Feature wall
- Decorative façade
- Lower and upper storey external walls
- Custom “Cranked” corner panels that can supplied in lengths up to 4.6m long
- LuxeWall FlameGuard[®] can be used as a Boundary wall system when a 60-minute fire rating is required in a residential project. Also offer a FRL 90/90/90 for use in commercial or residential applications

INSTALLATION

- Fast and easy, generally can be installed with just two people
- UniSmart Base trims complete with weep holes and weatherproof rubber sealing gasket
- UniSmart Trims for windows and doors
- Concealed fixings
- Panels can be customized to required lengths up to 6.5m

*Please check with NCC for permissible solar absorptance before selection the exterior colour. Darker colours may be warranted for use in limited regions

RENDER SYSTEMS

*VERSATILE, CLEAN AND MODERN; CREATE
A RANGE OF LOOKS WITH RENDER*

RENDER HARDIE™ FINE TEXTURE CLADDING

Create exterior walls with a modern rendered look without the need for a renderer, specialist cement or acrylic texture coating

FIRE RATED

BAL RATED

NON-COMBUSTIBLE

LOW MAINTENANCE

MATERIAL AND CONSTRUCTION

- Made from fibre cement
- 10 year limited warranty
- Maintains its integrity and general appearance for the long haul
- Preprimed to hold paint longer
- Sheets can be painted in modern and darker colours without affecting performance
- V-groove joint detail accommodates building movement and darker paint colours without the risk of cracking
- Available in wider and taller panel sizes for minimal joints and maximum coverage

APPLICATIONS

- Lower and upper storey external walls
- Full wrap or a feature

INSTALLATION

- Embedded texture delivers modern render look without the need for wet trades – simply fix and paint
- Easy-to-install shiplap design
- Wider and taller panel sizes mean minimal joints and maximum coverage

MAINTENANCE

- Low ongoing maintenance – simply wash down periodically
- Resistant to cracking, lime staining, rotting, moisture damage, shrinking and swelling

INSTALLATION GUIDE

RENDER BASEBOARD SYSTEM

Australia's premier, lightweight External Insulation Finishing System (EIFS). The Unitex Baseboard System provides excellent thermal properties and design flexibility to create a range of insulated modern and traditional homes

- FIRE RATED
- BAL RATED
- NON-COMBUSTIBLE
- LOW MAINTENANCE

MATERIAL AND CONSTRUCTION

- Uni-Base Boards® are manufactured from fire retardant "SL and M" grade Expanded Polystyrene (EPS) sheets as the raw material. The boards are meshed, coated and dried which increases the strength and adhesion performance of the boards and provides a controlled surface to render
- The precoated face protects the boards until they are rendered onsite
- Range of textures are available and all major paint manufacturers colours matched
- Precoated Cavity and Non-Cavity systems are available, as well as an uncoated Uni-IB Board system
- Unitex Uni-Base Board System is fully compliant to the NCC (BCA), CodeMark and BRANZ (when installed correctly)

APPLICATIONS

- Lower and upper storey external walls
- Full wrap or as a feature

MAINTENANCE

- Minimal maintenance required
- Annual wash down and spot checks

INSTALLATION

- Fast and easy installation – can be finished in approximately 1 week
- Light weight with minimal wastage
- Unitex® Uni-Base Board™ Cavity System is to be applied over breathable building paper clad suitable substrate. Must be installed as per the instructions in the Unitex Technical Manual
- The accredited system incorporates the Unitex nominated components as tested and allows nil substitution
- The Unitex Baseboard System is made up of the Base Board Sheet, Base Block, aluminium angle, fibreglass mesh, fixings and washers, Polymer Render, Unitex Baseboard Render (BBR 8.5), Unitex Uni-Trowel Décor Texture, Unitex Protective Top Coat (PTC)
- Only 75mm and 100mm Baseboards can be BAL rated. Unitex must sign off on BAL 29 and 40 projects
- Direct fix to the timber or steel frame or via cavity battens. Can also be installed on battens for older walls
- No additional framing required
- Full range of Architectural Uni-Shape Profiles and Columns also available to complete traditional and monolithic looks
- Unitex Acrylic Renders and Textures can also be applied over bricks, concrete, blockwork, fibre cement sheeting and AAC panels

RENDER POWERPANEL^{XL} AND POWERPANEL⁵⁰

FIRE RATED

BAL RATED

NON-COMBUSTIBLE

LOW MAINTENANCE

MATERIAL AND CONSTRUCTION

- AAC (Autoclaved Aerate Concrete) is made from readily available raw materials such as sand, cement, lime, gypsum, recycled AAC, water, expansion agent
- Steel reinforcing with anti-corrosion layer
- Square edge profile
- Can be used as external walls, party walls and dual zero boundary walls
- Manufactured in Australia for over 25 years
- Excellent thermal resistance
- Great acoustic performance

APPLICATIONS

- Lower and upper storey external and internal walls
- Full wrap or as a feature

INSTALLATION

- Fast and easy to install
- Light weight and easy to handle
- Fast to construct - one standard Hebel panel is the equivalent of 75 traditional bricks, which means Hebel external walls 150m² home can go up as quickly as within three days when installed by experienced Hebel installers
- Fixed to steel or timber frames via metal top hats
- Available in standard lengths and can be made to measure so minimal cutting on site
- Can be used for external and internal walls
- CSR Hebel provides quality technical support to assist in the design and construction of projects as needed

MAINTENANCE

- Maintain as recommended by coating manufacturer
- Termite and rot resistant

TIMBER

*TIMELESS TIMBER ADDS WARMTH,
TEXTURE AND INTEREST TO ANY STYLE*

TIMBER SELELOK

Weatherboards with unique shiplap self-locking system which ensures that each board is perfectly aligned and easily installed

FIRE RATED

BAL RATED

LOW MAINTENANCE

SUSTAINABLE

MATERIAL AND CONSTRUCTION

- Made from 97% Australian hardwood timber and 3% wax
- Better than zero carbon footprint
- No added silica, glues or formaldehydes
- Sustainably sourced timber
- Available in preprimed and natural finishes
- 10 year warranty on natural
- Made in Australia for over 50 years

APPLICATIONS

- Available in preprimed boards
- Lower and upper storey external walls
- Full wrap or a feature
- Internal feature walls

INSTALLATION

- Fast and easy to install thanks to shiplap system which allows every board to self-gauge
- No special tools required for cutting
- Lightweight product – under 10kg per square meter
- Watertight – mechanical flashing and joining accessories mean that sealant control joints are seldom required
- All profiles can be direct fixed to frame within warranty
- Cavity systems can be used as an option
- Off stud joining option enables minimal waste and less timber stud layout

MAINTENANCE

- Termite resistant
- Low maintenance – tested not to rot, split or crack

TIMBER WEATHERGROOVE

Create contemporary, urban homes with an architectural look with the vertically grooved cladding, Weathergroove

FIRE RATED

BAL RATED

LOW MAINTENANCE

SUSTAINABLE

MATERIAL AND CONSTRUCTION

- The largest grooved panel available in Australia – 3.66m in height - minimising horizontal lines and speeding up installation
- Made from 97% Australian hardwood timber and 3% wax
- Better than zero carbon footprint
- Deep vertical lines for a bold expression
- Available in natural or pre-primed
- Australian made and owned for over 50 years
- Sustainably sourced timber – PEFC certified
- 25-year warranty on primed product, 10-year warranty on natural product

APPLICATIONS

- Residential
- Lower and upper-storey external walls
- Full wrap or as a façade feature
- Schools, childcare centres and commercial builds
- Internal feature walls

INSTALLATION

- Quick and easy to install
- No special tools required for cutting
- Easier to paint than other materials on the market due to its smoother surface
- Lightweight product – under 10kg per square meter
- Watertight – mechanical flashing and joining accessories mean that sealant control joints are seldom required
- Off stud joining option enables minimal waste and less timber stud layout
- Range of groove spacing for various design options
- Universal edge which makes it possible to flip and reuse offcuts

MAINTENANCE

- Termite resistant
- Low maintenance – tested not to rot, split or crack
- Average repainting every 15 years

TIMBER SHOU SUGI BAN

MATERIAL AND CONSTRUCTION

- Shou Sugi Ban comes as a complete system supplied with black matte aluminium trims to seal out moisture and finish the look
- Crafted from solid Australian Cypress and Australian hardwood
- BAL rated – up to BAL 29
- Profile includes relief grooves to reduce warping and cupping
- Manufactured in Australia

APPLICATIONS

- Lower and upper storey external walls
- Full wrap or as a feature

INSTALLATION

- Secret fix profile
- Screw location line indicates exactly where to fix the cladding board, allowing the next row to slide over the existing board and create a secret fix finish
- Allowances have been made for expansion gaps, but must be implemented using a 6mm spacer to achieve a uniformed shadow line
- All aluminium trims are factory fitted with waterproof gaskets designed to expedite the on-site sealing process, and reduced the delivery of loose materials.
- Shou Sugi Ban is supplied pre-oiled with Feast Watson Timber and Deck Stain, Black Japan to assist in the protection from aging and colour change
- Install guide provided

MAINTENANCE

Feast Watson Timber & Deck Stain, Black Japan or Intergrain Industrial Solid Timber Stain Charred Black is periodically required to maintain the dark burnt look of Shou Sugi Ban

TIMBER SHADOWLINE CLADDING

The most natural timber looking composite cladding in Australia, fully finished and requires no painting ever. Guaranteed not to fade in even the harshest conditions

-  PREFINISHED
-  LOW MAINTENANCE
-  SUSTAINABLE

MATERIAL AND CONSTRUCTION

- The core is made of 60% recycled dense wood fibre mixed with 35% high grade recycled plastics (HDPE).
- Fully-capped, the shield is made of special engineering grade polymer and additives with a water absorption rate as low as 0.1%. The shield fully caps the core around all four sides (including grooves).
- Durable – 25-year residential and 10-year commercial warranty

APPLICATIONS

- All exterior wall linings
- Alfresco ceiling linings
- Privacy screens

INSTALLATION

- Fix to battens
- Concealed clip system
- Matching corner and end trims
- Horizontal or vertical installation

MAINTENANCE

- UV inhibitors, will not fade
- Low maintenance, no oiling, sanding, or painting – ever
- Ultra-protection against moisture, and termites
- Dust and dirt washes off

INSTALLATION GUIDE

VERTICAL AND HORIZONTAL GROOVE ENDURE TIMBER CLADDING

MATERIAL AND CONSTRUCTION

- Made from select grade Cumaru hardwood
- Porta Endure Timber Cladding is available in a range of textured profiles and a shiplap profile. Unique specific custom designs can be produced to suit the requirements of a project
- Termite resistant
- Near zero leaching
- Class 1 Durability – Lasts 40+ years above ground
- FSC® certified as responsibly harvested and processed
- Sustainably Certified
- Made to order

APPLICATIONS

- Lower and upper storey external walls
- Full wrap or as a feature
- Internal feature walls

INSTALLATION

- Textured profiles are available with a tongue and groove connection for easy alignment and fast installation
- Shiplap is available as standard with a tongue and groove connection. Alternative connections include D-Joint and Face Fix, available on request. D-Joint is a specialty engineered connection that has been designed for increased fixing strength and superior weather tightness
- All designs allow for expansion
- Preferred fixing is by cladding screws, such as 4.0 x 45.0 mm or equivalent
- Lengths can be joined by fixing ends over a batten or stud. End-matching is currently not available
- Optional pre-coating services available

MAINTENANCE

- Porta Endure can be enhanced by a range of clear coatings, as well as oil and wax-based coatings
- A maintenance schedule is recommended to preserve the appearance and dimensional stability of the timber
- To maintain the timber colour, choose a pigmented coating. If the goal is for the timber to weather to grey, choose an unpigmented coating

- Simple installation using the proven and versatile Commercial ExpressWall™ Fixing system
 - Express joining
 - Can be installed with either an exposed wafer head screw or colour matched rivet

- MAINTENANCE
- Minimal ongoing maintenance
 - Weathers naturally and seamlessly blends into its environment
 - Barestone external panels may need to be rinsed down with a hose from time to time as needed
 - The durability of Barestone can be enhanced by periodic inspection and maintenance. Any damage should be repaired by resealing

CONCRETE TERRITORY QUARRY

Create modern, industrial homes and semi-commercial projects using the concrete look of Cemintel Territory Quarry

PREFINISHED

FIRE RATED

BAL RATED

NON-COMBUSTIBLE

LOW MAINTENANCE

MATERIAL AND CONSTRUCTION

- Cement bonded fibrous wood particle
- 10 year warranty

APPLICATIONS

- Lower and upper storey external walls
- Full wrap or a feature
- Internal feature walls

INSTALLATION

- Machined with a complimentary tongue and groove that fit easily together
- Simple clip fixing system
- Concealed joining
- Choice of simple aluminium or colour matched, preformed corners
- Provides a ventilated cavity to keep your building dry
- NichiGuard® stain resistant and self-cleaning coating
- Compressible sealing strip factory bonded onto the tongue profile to form a weather resistant joint

MAINTENANCE

- Minimal ongoing maintenance
- Regularly inspect panel surfaces and follow wash down procedures when required
- Platinum coating technology protects against UV damage and colour fade

INTERNAL LININGS

WEATHERGROOVE

MATERIAL AND CONSTRUCTION

- The largest grooved panel available in Australia – 3.66m in height – minimising join lines and speeding up installation
- Made from 97% sustainably sourced hardwood timber and 3% wax
- No added silica, glues or formaldehydes
- Better than zero carbon footprint
- Deep vertical lines for a bold expression
- Available in preprimed and natural finishes
- Made in Australia for over 50 years
- 25-year warranty on primed product, 10-year warranty on natural product

*Refer NCC Volume 1 – Section C; Part C1.1 and Part C1.5

INSTALLATION AND MAINTENANCE

- Quick, easy to install
- No special tools required for cutting
- Easy to paint due to its smoother surface
- Lightweight product
- Watertight – mechanical flashing and joining accessories mean that sealant control joints are seldom required
- Off stud joining option enables minimal waste and less timber stud layout (preprimed only)
- Universal edge which makes it possible to flip and reuse offcuts
- Termite resistant
- Low maintenance – tested not to rot, split or crack
- Average repainting every 15 years

MATERIAL AND CONSTRUCTION

- Made from certified timber
- Easy to install
- Set lengths to reduce waste
- Able to be stained or coated
- Available in Tasmanian Oak and Clear Pine
- Suitable for straight and curved applications
- With consistent tongue and groove joints profiles can be mixed and matched to create unique designs
- Supported by a wide range of trims and mouldings including curved wall beads

INSTALLATION AND MAINTENANCE

- Suitable for vertical and horizontal applications
- Designed for ease of installation with a secret fix tongue and groove connection
